CA PA Registry

We specialize in providing professional physician coverage placing physician assistants of many specialties. We have connections with many area physicians and healthcare facilities. The positions requested may be daily or weekly. We also assist physician assistants with permanent placement. The cost of all these services are borne by the hiring entity (physicians or health care facilities). You just tell us whether you want to work part time, and if so the preferred hours, days and locale.

Physician Assistants Registry

We offer flexible career opportunities for Physician Assistants. According to a recent article by AAPA, PAs rank among the top 10 jobs during a recession. Quoting Money Magazine, AAPA disclosed that PAs are No. 5 on projected job growth. For 2008, this is estimated at 27%, with a median salary of \$84,000. This is the time of many opportunities for physician assistants. The flexibility of a position, combined with excellent remuneration and the continued growth in physician shortage, make for a unique climate for PAs to seek a job (or jobs) that will fit their lifestyle and advancement needs.

Physician Assistants

The physician assistant operates under a "Delegation of Responsibilities" which needs to be drafted in advance. We can help prepare these documents for our clients. Furthermore, PA's services must be performed "incident to" the physician's encounter. Physician assistants may be insured under the physician's professional liability (Malpractice) insurance, or the PAs may carry their own professional liability. The physician assistants must be an employee of the hiring entity, and for this reason we don't offer "Independent Contractor" status for our physician assistants. For billing purposes, most of the billing codes for PA-rendered services may be used as for the physician-offered services.

Physicians

Have you ever wished you could leave your office for a few days, and not worry about the continuity of care of your patients? An allied health professional (AHP) is the perfect choice. Whether as an AHP seeing and visiting patients, as a surgical assistant in an operating room, or as the professional performing Medical screening evaluations, the AHP is the perfect choice for your experienced physician assistant.

Nurse Practitioners

Although the acronym NP nor the title of Nurse Practitioner is in our site name our focus is equally geared towards providing Locum Tenens and Permanent Placement to NP's along with PA's. CA PA Registry also owns domain names that include the NP acronym but we decided on caparegistry.com simply because it sounded better and looked better than panpregistry.com which is actually one of our domain names. Nonetheless, if you are a well qualified and experienced Nurse Practitioner seeking Locum Tenens or Permanent Placement career opportunities in southern California then you have come to the right site. CA PA Registry will be posting positions for both PAs and NPs.

Hospitals

Do you need an allied health professional for affiliated clinics, emergency room triage or screening exams? Is there a need for assistance in the operating room or with cardiovascular surgery? We can help you find the right fit for your needs, either on a per-diem or permanent basis. We have a growing list of well-qualified Physician Assistants and Nurse Practitioners to help supplement your demanding staffing requirements.
